

MOTOMAN ArcSystem

VMH-500 S2DM

- Designed for operator ease of use
- Unobstructed view of the robot cell
- Complete safety kit

Designed for high performance arc welding of small to medium sized parts with relatively short welding cycles. The single, high speed arc welding robot and the two-station positioner makes it a small and efficient system.

The ArcSystem is built to a global standard that delivers savings in both time and money. It is based on a modular system of standard components that can meet the requirements of the general and automotive industry using a minimum of floor space.

Equipment	
Possible robots	MA1900, HP20D
Robot stand	H = 600 mm
Positioner	VMH-500S2DM, L = 2000 mm, max. payload 500 kg/station
Fume hood	L = 2200 mm
Safety kit	Safety fence, light guard, welding curtains, operator's panel
Welding equipment	<i>Not included. Must be quoted separately according to customer request.</i>

Options for positioner		
Controlled air	2 channels ø8 mm	
Signal transfer kit	Direct air: 1 channel direct air 3/8"	Signal transfer choice: 12 channels (BUS) 12 or 24 active channels
Controlled air + Signal transfer kit	Controlled air: 2 channels ø8 mm	Signal transfer choice: 12 channels (BUS) 12 or 24 active channels
Fixture mount	Brackets, for head- and tailstock
